Notice of Allowability

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: Claims 1-5 are allowable upon consideration of the prior art. The closest prior art is US Patent No. 4,048,091 (Barnaba). Barnaba discloses a process for producing reducing gases comprising hydrogen and carbon monoxide. The process comprising 2 stages, wherein in the first stage, a hydrocarbon is partially combusted with oxygen; and a second stage comprising adding hydrocarbon to the product stream from the first stage and contacting them with a first catalyst comprising a porous alumina or magnesia and a second catalyst comprising nickel oxide catalyst.

Barnaba fails to disclose or suggest the first step of the catalytic partial oxidation of a hydrocarbon; and fails to disclose or suggest adding oxygen rather than a hydrocarbon into the second stage. Nor would there be any motivation from the prior art to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
